

For over 20 years, the **Hach Technical Training Center's** knowledgeable, experienced instructors have helped thousands of operators and analysts manage their instruments and analyses more efficiently and with confidence. Our world-class training sessions feature the latest technologies as well as proper sampling and analytical techniques.

New Mexico Rural Water Association (NMRWA) is a non-profit membership organization that provides the highest quality training and technical assistance to rural water and wastewater utilities throughout New Mexico, and represents the legislative and regulatory interests of our members.

Basic Water Analysis

This workshop is an introduction to water testing techniques and systems for water quality measurements in applications including drinking water, wastewater, environmental water, and industrial water. The techniques covered in the class include colorimetry, electrochemistry, turbidity. This is a hands-on workshop. Students will calibrate instruments, analyze real-world samples, and verify results using standard solutions. *(NM Training Credit approval is pending)*
